- designed to accommodate indoor garage or basement of 8 feet
- for use on driveway, tennis court, backyard or any level hitting area

Custom-Made Backboards

If your situation requires a unique size or specialized color combination, we can custom make backboards using the same Bakko quality workmanship to meet your individual needs.

The best backboard in the business is also your best value.

There are many different types and styles of backboards. Most, however, fall into four categories: wood, cement block/concrete, net and Bakko.

All backboards provide user with a great practice partner and aerobic exercise for players of all ages and ability levels from beginners to top-playing professionals.

But the quality, reliability, variety, versatility and function of today's backboards can vary greatly.

What's the difference? Judge for yourself...Bottom line is, "You get what you pay for!"

Comparison Table

Type: Wood

Advantages: low initial expense

Disadvantages: warps • peels • requires frequent repainting • loud and noisy • poor bounce • limited design • average life of only 2-5 years

Type: Cement Block/Solid Concrete

Advantages: durable, if on deep steel-reinforced concrete base • low noise • good bounce

Disadvantages: high cost • requires frequent repainting • installation requires construction crew • permanent fixture • high ball wear from masonry • little design variety • requires special foundation

Type: Net

Advantages: quiet • low cost • portable • requires little space • minimal set-up time • can be used indoors and outdoors

Disadvantages: unrealistic rebound • small hitting area • limited design • difficult background visibility

The difference is...

BOLLETTIERI BACKBOARDS BY BAKKO

NUMEROUS STYLES AND SIZES

- Five series of fiberglass backboards
- Three series of net backboards
- 8- and 10-foot heights
- 12-, 16- and 20-foot standard widths
- Continuous walls

TECHNOLOGICALLY SUPERIOR OUTDOOR MATERIALS

- Fiberglass
- Gel coat
- Imron paint
- Sound-deadening matrix interior

AFFORDABLE

- Wide range of costs
- Competitive with wood and less expensive than cement
- Best buy for your backboard dollar

TRAINING AND CONDITIONING AID

- Ideal for practicing consistency and placement drills

EASY INSTALLATION

- Typically takes two people 2-4 hours to install
- Complete installation kit
- Interlocking green fiberglass panels

While other types of backboards may cost less initially, they can quickly become weathered and unsightly, needing to be replaced, costing you more money...

Bollettieri Backboards by Bakko are designed to stay looking great even after 10 years, as shown above, with minimum maintenance and peak performance. — your best value in tennis backboards.
