

Douglas® Straightliner Tape Machine

Straightliner™ ITEM # 63700
Straightliner™ Plus ITEM # 63600

SPECIFICATIONS

FRAME

The frame is constructed of black powder-coated steel and the tape holder is non-corrosive aluminum.

ROLLERS

The smooth rollers are constructed from durable black rubber. Rest assured that the hard rubber wheels are non-marking and will not leave unwanted marks on the court.

FEATURES

Other features include a comfort grip black rubber handle and a removable 10" pointer guide that screws into to the front of the base frame.

WARRANTY

1 Year standard warranty

The Douglas® Straightliner was developed over 35 years ago and is the original tennis court line tape machine! The Straightliner is the fastest and easiest tool to mask court boundaries for striping tennis courts, pickleball courts, basketball courts, and other surfaces where precision straight-line markings are required. This proven design is built to last for years of maintenance free service.

This industrial painter's tape machine lays masking lines precisely and evenly up to 3" apart. The tape width can be changed in seconds by simply swapping out the white plastic guides. This sport surfaces line taping machine is built to last years and will tape hundreds of new and resurfaced courts.

MODELS

STRAIGHTLINER
